Antiskid Zirconium-containing Ceramic Roller

1,Description of Antiskid Zirconium-containing Ceramic Roller

The surface of the product is striped, which greatly improves the anti-skid performance of the product, makes the sintered product of transmission not easy to slide left and right and changes the direction of travel, and avoids the damage caused by collision. After adding ZrO₂ powder into the product, the wear resistance,suddenly-changing temperature resistance, bending strength and flatness of the product are enhanced, and the use times of the product are effectively increased.

2,Index of Antiskid Zirconium-containing Ceramic Roller:
